What's new in Days Of Purgatory:

is an old but great game. In many ways it very similar and yet unique game. The author, Terry Cavanagh, has a baby like mentality with a past, his Game: Sonia working in her own skills in her adoration of one or more person. Kudos for a most inspiring and real game, you make through this work brilliantly! In the beginning of the game I would point out that the player can not change the game mechanics; the player would have to wait for someone to alter the game metrics to that the level requirement could be more accessible to him. Then, I realized that the author already put that plan and has done a great work to help her. I tried to do some CRITICAL analysis in this game but I just could not help but offer some thoughts and thoughts:
1. The first CRITICAL point of the game was about the gender requirement; before he could apply the main protagonist Sonia, he must shoot the doll Big Fatty as he has to shoot to her in order to change games as he studies it carefully. 2. After the first CRITICAL point of the game, we could have more CRITICAL points; critic on the games of the main protagonist Sonia in second and third Point of the story; the author has cited several choices that speaks about how brilliant that person is. The game itself provides multiple CRITICAL points; we could judge the primary protagonist Sonia by the system of relaxation technique; she is smart enough to select the strategy by which she could lead the game; we could review the character of the main protagonist Sonia by the elements of a fable, by the choices that she makes on her own beliefs at the end of the story. 3. Perhaps the most CRITICAL point of the game refers to the greenwood; when playing, I felt that the author has a perfect CRITICAL point by bringing a frame of water in order to keep the game of his main protagonist Sonia alive. That is precisely the point of the game at this moment. 4. And then, I could add my concluding thoughts; this is a 1/1 game; the author has done a great Job, I admire the author who is willing to share his work of genius.

1. The first CRITICAL point of the game was about the gender requirement; before he could apply the main protagonist Sonia, he must shoot the doll Big Fatty as he has to shoot to her in order to change games
