PlayMii - Play free to play games on Wii with Wii virtual console emulator on PC.Q: Regex search for strings containing php functions I'm trying to look for strings that contain php functions but only return those that contain a specific function (in this example the function "strtoupper"). Please note that I don't want to search for strings that contain a word like "php" or "the". What I'm looking for is: strtoupper function or any other function that starts with strtoupper expression that starts with some string like strtoupper and ends with > Examples: strtoupper is never part of the string strtoupper is part of the string so my search should return it but not the line above strtoupper is part of the string and it's always followed by a > I have tried so far with: /^.*strtoupper.*\(.*\).*/i I would prefer to use regex instead of for loops if possible. A: ^.+?(strtoupper\(.*\)\s+)+$ You can use the positive lookahead to assert the strtoupper(portion at the end of the string and capture the captured group and remove the remainder of the string up to the) and then match 1 or more spaces before the (. FDA Approves Long-Acting Opioid Injection New In what the FDA is calling “another step forward in bringing a powerful new class of pain treatment products to patients suffering with chronic pain,” the U.S. Food and Drug Administration (FDA) on September 12, 2016 approved the use of long-acting (LA) injectable opioids (LA-O) in an intramuscular (IM) formulation for patients with chronic pain. It should be noted that the FDA approved the use of LA-O in an IM formulation for the treatment of pain and for which the dose is the
