Q: MySQL 5.6 INSERT if auto increment exists, Insert all fields if not I have a table in MySQL (5.6) in which there are two auto incremented fields: id_1, id_2 The table has the columns: id_1, status_1, status_2, status_3, status_4, status_5, status_6 It has indexes on all of the columns with UNIQUE KEY id_1 I am trying to insert all the fields if the user does not insert id_1. If the user does do insert id_1, nothing should happen. So far, what I have is \$query = "INSERT INTO foo (status_1, status_2, status_3, status_4, status_5, status_6) VALUES ('\$status_1', '\$status_2', '\$status_3', '\$status_4', '\$status_5', '\$status_6') ON DUPLICATE KEY UPDATE id_1 = id_1, status_1 = '\$status_1', status_2 = '\$status_2', status_3 = '\$status_3', status_4 = '\$status_4', status_5 = '\$status_5', status_6 = '\$status_6'"; My problem is the above does not work because if there already is a key and value, I want all fields to be added, and id_1 to be incremented. The way I am doing the field assignment in this case does not work. A: Try adding

I'm getting a little tired of the 3-4 characters I make per pack so here is a new pack of 6 characters to fulfill that need! They are a little different from the usual variety but that's why I make these kinds of packs. These characters have a different style and a different genre! Story-based characters are common in video games but less common in RPG Maker. However, I find that's what makes them unique! They usually have interesting stories and their style is fun to play around with. I'm sure these characters will fit in with any game genre you're creating! A: I think I got that 100. Not sure though because I don't like to start at the beginning. Should I start some of the last 8 or 9 round? I've made a few hundred words for the last 100 rounds, and I also think I made the final word for round 25. I haven't taken a look at the last eight rounds of the countdown, but I don't think I made the last eight rounds. As a rule of thumb, I'd say it's better to start some of the last rounds. The other option is to start with the last 8 or 9 rounds of the first set, but then start from the first set. Either way is fine. Q: Function with composition recursive in Haskell. I have a question about composition function in Haskell in exercise 4.4. from Learn You A Haskell. The task is the following.
